- Setup Guides
  - Windows (UWO Domain)
  - Windows (Non-UWO Domain)
  - macOS
  - Ubuntu
Windows (UWO Domain)

If you log in to your PC with your Western username and password, please see Installing a Printer on Windows (UWO domain).

Windows (Non-UWO Domain)

If you do not log in to your PC with your Western username and password, please see Installing a Printer on Windows (non-UWO domain).

macOS

1. Download and install the Lexmark T640 macOS printer driver.
2. Follow the instructions at Installing a Printer on macOS, noting the printer-specific steps below.

- **Step 9**: Enter `smb://sciprint.uwo.ca/mc230` in the URL field.

- **Step 11**: Select Lexmark T640 in the Printer Software dialog box.
Step 13

In the printer options dialog, select the following values:

<table>
<thead>
<tr>
<th>Option</th>
<th>Value</th>

</tr>
<tr>
<td>Printer Memory</td>
<td>640 MB Memory</td>
</tr>
</tbody>
</table>

Ubuntu

Click here to expand...

1. Follow the instructions in Installing a Printer on Ubuntu, ignoring the instructions in the Prerequisites section about installing a driver. The Lexmark T640 driver is included in Ubuntu. Note the printer-specific steps below.

Step 4

Enter `sciprint.uwo.ca/mc230` in the SMB Printer field.
Step 6

Select **Lexmark** for the manufacturer of the printer.

Step 7

Select **T640** from the **Models** list, and **Lexmark T640 Foomatic/Postscript** from the **Drivers** list.
